#### Overview

Lockbox Online provides a single dashboard for access to consistent information for all lockbox remittances.

Use Lockbox Online to

- · View receivables information and images
- Search across lockboxes for remittance information
- Review, edit and resolve remittance exceptions

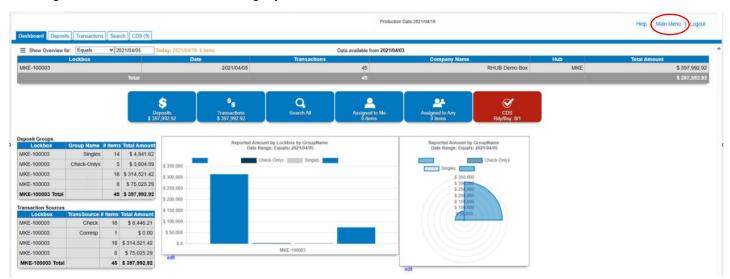

Many different features of Lockbox Online are shown in this guide. The specific features available to you will depend on

- The processing options selected by your company
- Your personal access as set up by the user administrator
- The image and information retention period selected by your company

### Reverting to the Legacy Viewer

Throughout 2025 and 2026, clients will be upgraded from the legacy viewer to the new viewer. There will be a *brief period* during your upgrade window when you will be able to navigate from the new viewer back to the legacy viewer if desired. Your upgrade window and transition timing will be communicated separately.

To navigate from the new viewer to the legacy viewer, from the dashboard, click 'Main Menu'

At the middle right of the screen, select the lockbox that you wish to view using the legacy viewer.

- If there is no longer a link to click, your brief transition period has expired and you no longer have access to the legacy viewer
- To return to the new viewer experience, click 'Receivables Hub'

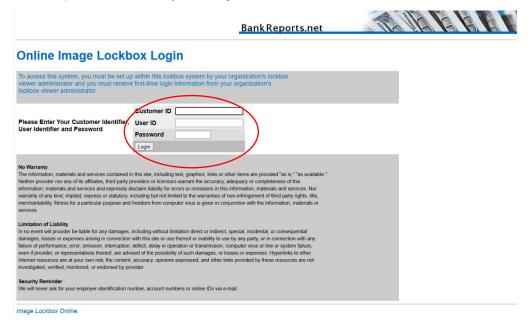

#### Login to Lockbox Online

Each user is presented with the Login screen.

- Customer ID: input your Customer ID
- User ID: input your individual User ID
- Password: input your PIN followed by the 6 digits from your SecureID token device.

This will provide access to your assigned lockboxes.

## View Images and Information

Your Lockbox Online viewer will present remittance information according to your subscribed retention period.

#### Access daily deposit information for all lockboxes

The first screen you'll see after login is the Lockbox Online Dashboard

On the Lockbox Online Dashboard, you'll see your deposits for all lockboxes to which you are entitled.

• If you do not see lockbox information, please use the drop-down ('Show Overview For') and select your desired timeframe

Your daily totals for each lockbox box are shown at the top right of the Dashboard.

If you have multiple deposits per day, you'll see the totals for each lockbox increase after each deposit until all of
your deposits have been completed for the day

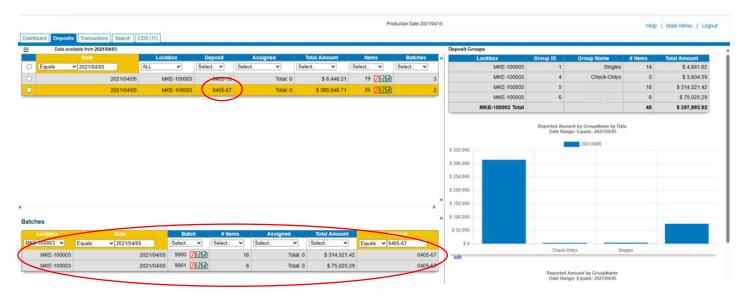

#### Access batch totals

Click the 'Deposits' tile

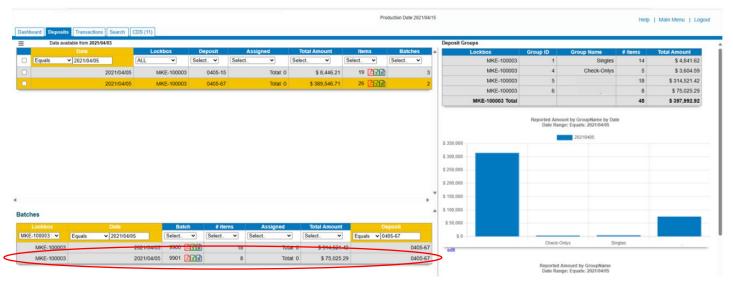

At the top of the screen, you'll see all of your deposits for each lockbox to which you are entitled.

- This is where, if any of your lockboxes have multiple deposits each day, you can see each intra-day deposit total At the top of the screen, in the Deposit column, select the desired deposit.
  - You'll see all of the batches for that deposit populate at the bottom of the screen
  - In either section, you can use the column header drop-downs to refine your results

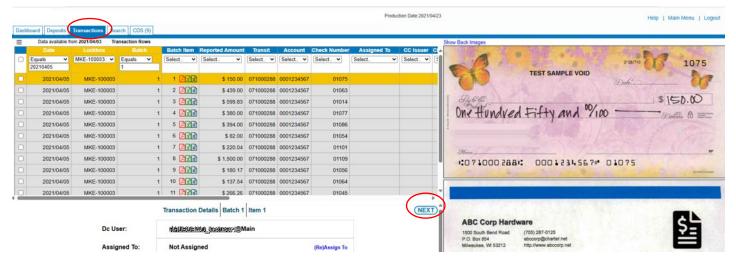

#### View all transactions in a batch

At the bottom of the screen, within the Batch column, select the desired batch

- You have now navigated to the Transactions view
  - o All transactions within that batch are listed at the top of the screen
  - o Transaction-level detail for each transaction is shown at the bottom of the screen
  - o The images associated with each transaction are shown at the right of the screen
- To navigate to the next transaction, you can either
  - Select the 'Next' button
  - Within the Batch Item column, select the desired transaction in the batch
- You can use the column header drop-downs to refine your results

3/25

#### **Create Standard Reports**

- At many points throughout your navigation process, you saw three report icons (highlighted thumbnails PDF, Excel or CSV) – click these icons to create the desired report
  - Most browsers will display a download status bar at the upper right of the screen (this display may vary depending on which browser you use) – larger reports may take several minutes to download
  - o You can perform other activities while you are waiting for your report to download
  - Use the download functionality of your browser to open the report

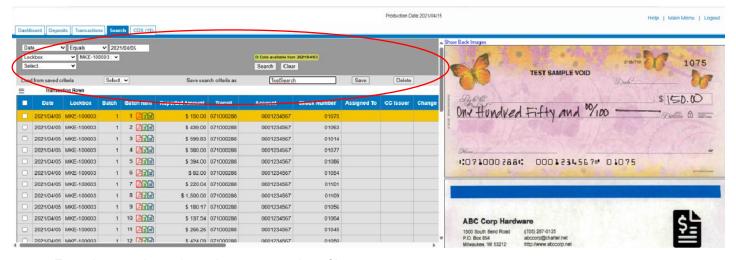

#### Search for transactions

Search for an item across all lockboxes, save search parameters.

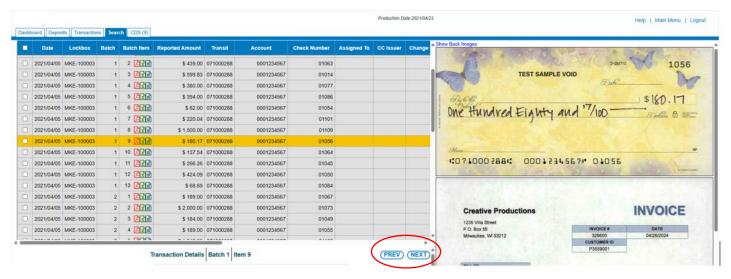

From the dashboard, select the 'Search All' tile

- Choose your search parameters at the top left of the screen
  - If you want to search within a single lockbox, indicate the lockbox of interest as a search parameter
- Click 'search'
  - o You will be presented with a list of all transactions that match your search parameters
  - o If your search results take too long to load, you may want to narrow your search parameters
  - o If this is a search you perform often, you can save the search
    - Enter a search name in the 'Save search criteria as' dialogue box
    - Click 'save'
    - Saved search parameters can be accessed from the 'Load from saved criteria' dialogue box

- From the search results, select a transaction of interest
  - o To see the next returned item, click 'Next'

#### Using the Menu Icon

The Menu icon is accessible in the upper-left of multiple different pages of the viewer

- This icon is primarily useful for
  - Reports create and save a custom report
  - Focus View limit results to a specific lockbox

#### Reports - create and save a custom report

In addition to the Report icons that can be accessed at multiple points throughout the viewer, custom reports can be created to display the results of the Deposits, Transactions or Search tiles.

- Click the 'Dashboard' tab at the top to return to the Lockbox Online Dashboard
  - o In the 'Show Overview For' drop-down at the upper left of the screen, select the desired timeframe
  - Select the 'Deposits' tile and choose the appropriate parameters to display transactions of interest

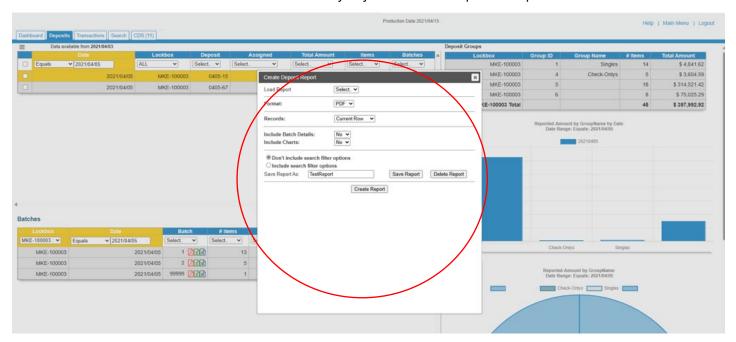

- Hover over the menu icon at the upper left of the screen
- Select the Reports option from the drop-down

3/25

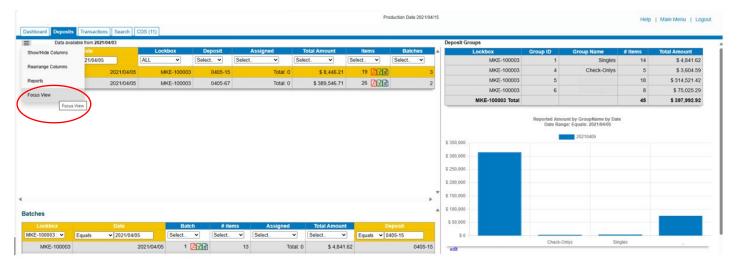

- Choose your desired report parameters
- If this is a report you may want to re-run frequently, you can name and save the report
  - Enter a report name in the 'Save Report As' dialogue box
  - o You can then re-run the report in the future by selecting it from the 'Load Report' drop-down
- Click 'Create Report'
  - Most browsers will display a status bar at the upper right of the screen (this display may vary depending on which browser you use) – larger reports may take a few minutes to download
    - You can perform other activities while you are waiting for your report to download
    - Use the download functionality of your browser to open the report

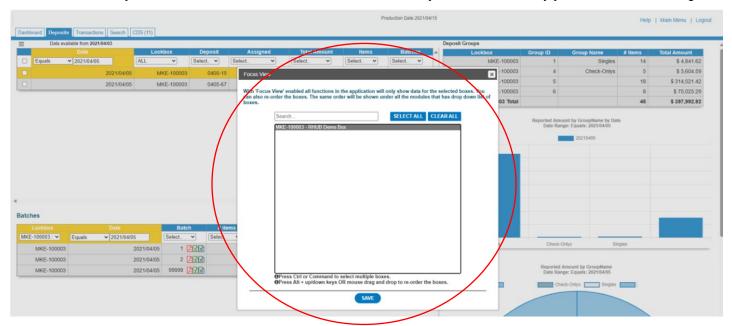

#### Focus View – change your defaults to see only specific lockboxes

- Within the Dashboard, Deposits, Transactions or Search views, you may wish to see all information for all lockboxes to which you are entitled, or you may wish to see only specific lockboxes.
  - o You can use 'Focus View' to set your default view to specific lockboxes only
- Hover over the menu icon at the upper left of the screen
- Select the 'Focus View' option from the drop-down

- Choose the box or boxes of interest, and select 'save'
  - This will set your default lockbox view for the Dashboard, Deposits, Transactions and Search views
  - o If you want to see transactions from other lockboxes, you'll need to modify your Focus View settings

# Online Exception Review (CDS)

If your company has chosen Online Exception Review as part of your lockbox service, exceptions can be reviewed and edited prior to being included in your transmission. You'll see the 'CDS' tile on the Lockbox Online Dashboard, and within that tile, you'll see the number of exceptions to be worked and currently being worked.

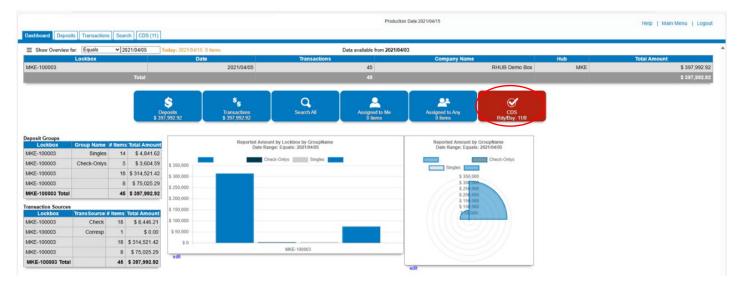

If your company has chosen the service, an email notification is sent to your company daily to notify you of exceptions.

If your company has enrolled in Online Exception Review, you would have provided the Bank with instructions on which items must be reviewed, edited and approved by your company prior to being included in your data transmission as a postable item.

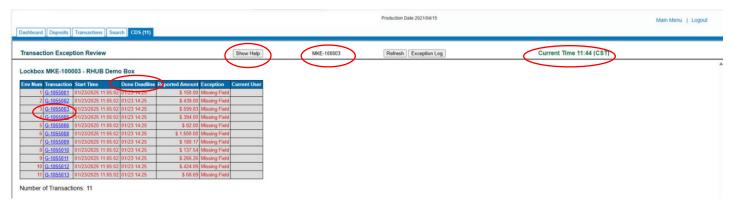

• The most common type of exception requiring edit is missing remittance information, such as a missing or incomplete invoice number

#### View and repair an item

 From the Lockbox Online Dashboard, click the 'CDS' tile to view a list of all decisioning items available to be reviewed

- CDS items must be accessed and reviewed by lockbox
  - To access CDS items for a different lockbox, select that lockbox from the drop-down menu in the top middle of the screen (the drop-down only displays if you are entitled to multiple lockboxes)
- Within the 'Done Deadline' column you can see the deadline (Central time) by which you must correct each transaction
  - If you do not correct an item by that Done Deadline, it will be processed per the instructions provided by your company at setup
    - Most commonly, this means that the item will be included in your transmission without any
      correction, but this can vary by company, depending on the instructions your company provided
      at setup
  - System time is shown at the upper right of the screen
- Select and process each transaction
  - o Detailed instructions can be found by clicking the 'Show Help' button at the top of the screen
    - Follow these instructions to process each transaction
- The following example illustrates the use of the system. Please note that your experience may differ depending on the business rules set up by your company
  - From the 'Transaction Exception Review' page, select an item to be worked by clicking its Transaction number in the Transaction column

- To the left you'll see transaction details, and to the right you'll see images of the transaction
- In red near the top of the screen, you'll see an explanation of why the transaction is an exception
- Further down, in red, you'll see the transaction details to be corrected

Select 'Edit' to modify the transaction or 'Add a new invoice' as appropriate to correct the transaction

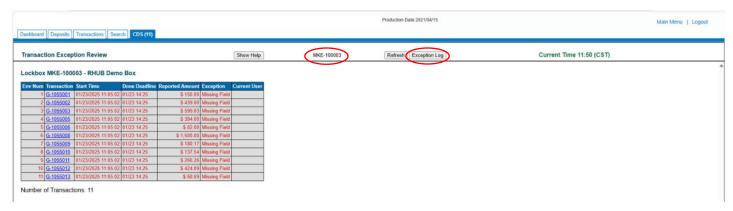

- Make corrections to the transaction as appropriate
  - At the top of the page select a Decision Reason (if applicable) and select 'Accept' or 'Reject' (Reject is not an option for all types of lockbox setups)
  - To save your changes without making an accept or reject decision, click 'Save'
  - o To exit a transaction without making changes, click 'Done'
- Once each transaction has been Accepted or Rejected, it will no longer appear on the 'Transaction Exception Review' page
- Work all transactions until none remain on the 'Transaction Exception Review' page
  - Make sure to work all exceptions in all lockboxes

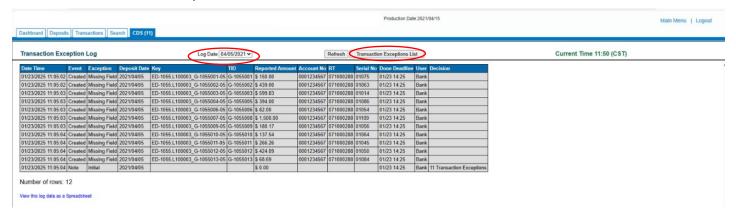

#### Access an audit log of changes

- In the drop-down at the top center of the screen, choose the lockbox for which you want an audit log (the drop-down only displays if you are entitled to multiple lockboxes)
- Click on the Exception Log link at the top of the screen

- Select the desired Log Date to see all Online Decisioning activity for that day
- Click 'Transaction Exception List' to return to a list of items to be decisioned

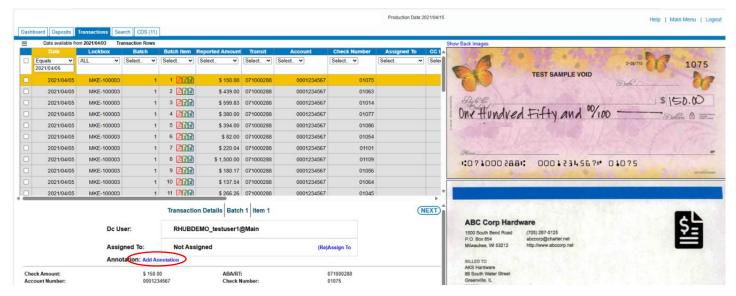

# Annotating Transactions, Assigning Users to Review Specific Transactions

#### **Annotate Transactions**

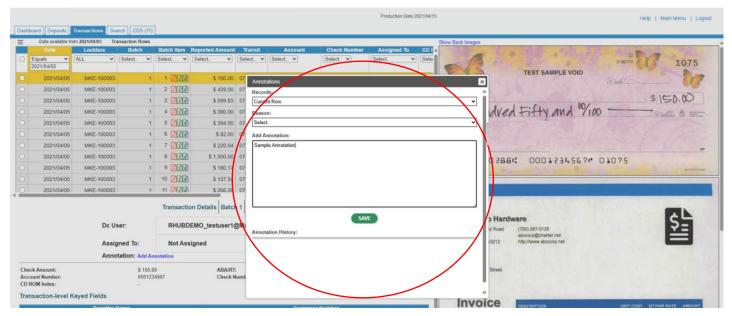

Within the Lockbox Online system, you can annotate transactions. This might be useful, for example, if a customer short-paid an invoice and you would like to record the short-pay reason with the transaction for future reference or audit. Annotations are not included in reports or in your daily remittance file.

- To annotate a transaction
  - Navigate to the transaction of interest using the processes explained in the 'View Images and Information' section of this document
  - At the middle of the screen, click 'Add Annotation'

3/25

- Indicate the records to be annotated, the Reason (if set up by your company at implementation) and enter the Annotation
  - Select 'save'
- When the modified transaction is viewed in Lockbox Online, the annotation can be seen along with the transaction detail and images

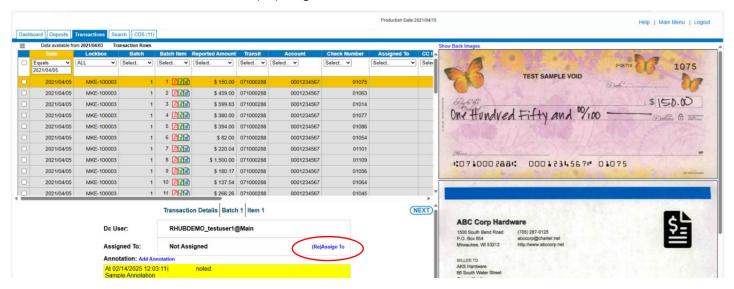

#### Assign a Transaction

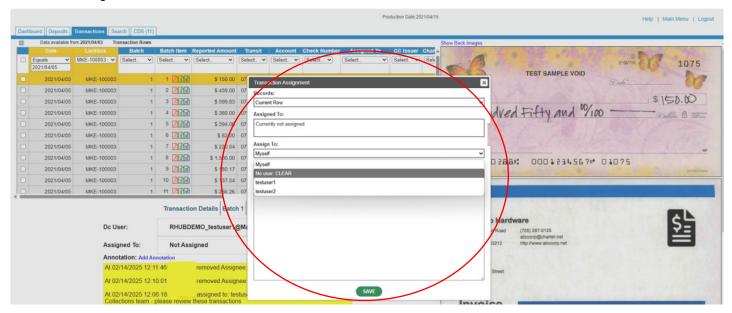

Within the Lockbox Online system, you can assign specific users to review specific transactions

- This might be useful, for example, if there are specific transactions that you want to flag for review by different departments that have access to Lockbox Online
- The 'Assign' functionality does not keep a transaction from being processed according to the standard processing rules on your lockbox
  - For example, if a transaction is assigned but not actioned by the assignee, the transaction will not be 'held' unprocessed until that assignee takes action
- Navigate to the transaction of interest using the processes explained in the 'View Images and Information' section
  of this document

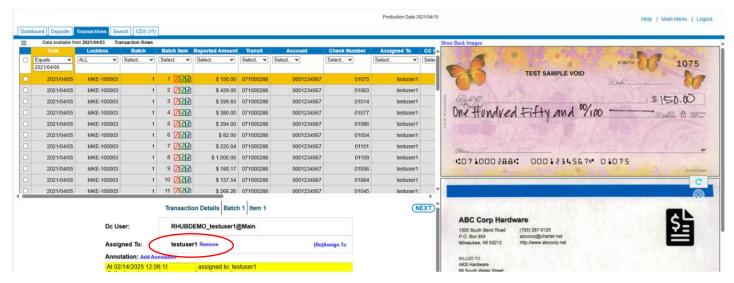

At the middle of the screen, click '(Re)Assign To'

- Indicate the records to be assigned, to which user they should be assigned, select the Reason (if set up by your company at implementation) and add an Annotation if desired
- Click 'save'
- When this transaction is viewed in Lockbox Online, the assignment can be seen along with the transaction detail and images

 To remove an assignment, either click 'Remove' on individual transactions, or use the assignment tool to remove an assignment by selecting 'No User: CLEAR' in the 'Assign To' field

On the Lockbox Online Dashboard, the 'Assigned to Me' and 'Assigned to Any' tiles will show the number of items
that have been assigned
